Active Foam Cleaner

SUPERIOR CLEANING FOR MODERN LIVESTOCK FARMING

Active foam cleaner

Outstanding adhesion

Proven cleaning
performance

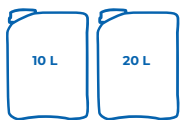

Actively penetrates and
dissolves dirt

Zix® Eco Power

A highly effective foam cleaner combining powerful cleaning action with excellent foam stability and rinsability.

Zix Eco Power is the ideal start for a successful and hygienic process. This powerful alkaline foam cleaner delivers excellent degreasing performance, tackling even heavily soiled and caked-on dirt with ease.

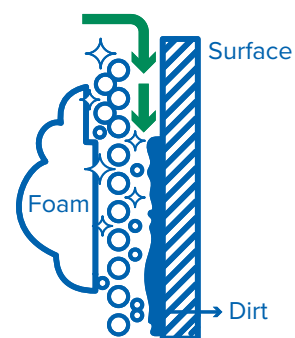

Its dense, stable foam clings to surfaces for optimal contact time and rinses off easily, ensuring efficient cleaning. The advanced formula remains highly effective even under challenging hard water conditions, supporting superior hygiene and biosecurity.

WORKING MECHANISM

Zix Eco Power is an active foam detergent. Through innovative product development, **Zix Eco Power** exhibits a perfect balance between adhesion time on the surface and dissolving and removing the dirt.

The cleaning process is as follows:

1. **Zix Eco Power** comes in contact and dissolves the dirt.
2. Foam bubbles start to pop.
3. The solution with dissolved dirt starts moving down.
4. A new foam layer is ready to act on the remaining dirt.
5. The process is repeated.

ADVANTAGES

- Engineered for heavy duty cleaning
- Superior foam ability and stability
- Outstanding adhesion: extremely suitable for vertical & horizontal surfaces
- Water efficient, also suitable for hard water
- No EDTA, phosphates or chlorine
- No fragrances or colourants

APPLICATION AREAS

Zix Eco Power is extremely well suited for:

Surface & equipment cleaning

- » Livestock housing, farm buildings and production facilities
- » Floors, walls and other hard surfaces
 - » Feeders, drinkers and troughs
 - » Feeding and housing equipment

The EU Ecolabel is a reliable label that identifies products with a reduced environmental impact. The label guarantees detergents with limited hazardous substances used, sustainably-sourced raw material, design and recyclability of packaging and proper guidance of the product user, without making a compromise on performance.

SUPPORT AND GUIDANCE

Contact our livestock technical team for support and guidance:

- » Full comprehensive training
- » The latest insights and technical know-how on biosecurity
- » Highly experienced livestock team from the industry, for the industry

*Cleaning removes over 90% of microorganisms and improves disinfection efficiency.
Using a premium product is crucial.*
